COMPANY PROFILE

Adelio Lattuada produces the widest range of edging and bevelling machines currently on the market:

- more than 30 models of electronic or with PC straight-line edging machines for flat edges with arris and variable angle from 5 to 16 wheels;
- complete line of double-edges from 8 to 12 wheels on each side, for flat edges with arris, available with many different possible configurations, both as stand-alone and in-line versions;
- more than 10 models of electronic or with PC straight-line bevelling machines from 7 to 14 wheels;
- 2 models of combined straight-line edging/bevelling machines (electronic or with PC) for the simultaneous processing of flat edges with arris and bevels in one single passage;
- 4 models of automatic corner grinding machines, able to process radius and straight corners of up to 20mm glass thickness in less than 30 seconds;
- 10 models of vertical washing machines both open or closed on top;
- accessories: a small washing machine that can be fitted on all Adelio Lattuada edging and bevelling machines' outlet conveyor.

The strong points of all products are their ease of use, long working life, very simple to use, low maintenance required and high processing quality. The company is also highly concentrated on the customization of all its models in order to adapt them to different customers' demands: a very wide and detailed list of options is available, and is continuously updated and increased in response to the evolving market.
