## ПРОДУКТЫ / МАШИНЫ

Thin glass of 1.0 - 1.2 mm, 1.2 - 1.5 mm, 1.5 - 1.7 mm thickness  
Float glass from 2 to 12 mm thickness  
Stained glass Flashed milk glass Reflo glass  
Tempered safety glass Matt glass and satin-frosted glass Borofloat  
Float glass mirrors from 1.0 to 6 mm thickness  
Double mirrors Translucent mirrors with 4 % transmission  
Plane and convex mirrors Magnifying mirrors  
Observation mirrors  
Automobile rearview mirror glasses for passenger cars, trucks and motor cycles  
Relief printing and screen printing on handbag and hand mirrors  
Cosmetic mirrors, digital printing and sandblasting

### **Automotive industry**

We have been a competent partner for the automotive industry for more than five decades in the areas of sun visor mirrors and exterior mirrors. The high quality of our products is appreciated by customers both at home and abroad.

### **Sun visor mirrors**

We produce sun visor mirrors in many different designs and shapes. Coated with a silver coating for a guaranteed high reflection, with cutting edges or grinded edges and the back provided with various types of fragment protection (hot adhesive or adhesive tapes). Even curved mirrors are possible

### **Exterior mirrors**

Exterior mirrors can be manufactured in different versions (planar, convex or aspheric). The various options with regard to the coating (silver, chrome and blue colour) round out our production diversity. Dividing lines, fonts or other markings can be made to our customers individual specifications. The application of heating foil or fragment protection in the form of various adhesive tapes is possible.

### **Furniture**

We have been a reliable supplier for many years to the furniture industry, especially in the area of bathroom furniture. We have made a name for ourselves due to our high quality, flexibility and reliability, so that our products have been well received by a great many customers. Float glass, plane mirrors and magnifying mirrors in all versions and shapes are standard in our production facility.

### **Mirrors**

You can find our products in many bathrooms. Whether plane mirrors or vanity mirrors, we manufacture every possible dimension and shape at the customer's individual specifications.

### **Glass**

We have numerous capabilities of processing plane glass. We refine the product to the customer's individual specifications in various edge processing versions (cut, grind or polished). We frost, etch, print, strengthen (chemically or thermally) and assemble for further processing.

### **Technical glass**

We manufacture glass in all shapes and processing forms.

Cover panels for measuring instruments such as pressure gauges, gas and water meters, speedometers and scales of all types of assemblies, glass for interior and exterior lamps, high quality printed glass for use in the medical and industrial field, thermally or chemically strengthened, heat-resistant or frosted, etched or drilled.

### **Advertising mirrors**

Advertising mirrors belongs to LECO since a long time.

Whether pocket mirrors, folding mirrors or hand mirrors.

## **ИСТОРИЯ И ПРОДУКТЫ**

LECO is a mirror and glass processing company with 70 employees and has been headquartered in Schönsee/Bavaria since 1962. It was originally established in 1928 in the town of Lommatzsch in Saxony and has been successfully operated for over three generations.

However not only the owners remained loyal to the company, a large part of the employees also had great solidarity with their employer throughout the many years of their working relationship.

This is also the basis between us and our business partners.

The company Lehmann + Baltzer was founded by Bruno Lehman and Paul Baltzer in a basement in the town of Lommatzsch in Saxony.

The history of our current company started with the production of cosmetic mirrors, lenses and reading glasses.

In 1950, Lehmann + Baltzer was re-established in Schönsee with the then owner HG Lehmann under its present name of LECO GmbH. The town of Schönsee was chosen because many glass processing companies had settled in this area along the so-called "watercourse" and ideal conditions were, therefore, available for glass and mirror manufacturing.

At the beginning, we started with the production of hall mirrors, but LECO succeeded in its entry into the automotive industry in 1954, for which we are still active to date in the production of exterior mirrors and sun visor mirrors of different models. 10 years later, the earlier tradition with vanity mirrors has successfully continued by including these again in production schedule. In the 1990's, LECO took a foothold in the furniture and plumbing industry and has since supplied major companies with glass and mirrors in different sizes, shapes and finishes.

With the introduction of a quality management system in 2003 and the subsequent certification to ISO 9001, LECO addressed the increased demands of customers and installed a water treatment system in 2008 in order to also contribute to environmental protection
