ИСТОРИЯ И ПРОДУКТЫ

VITROSEP was founded on 1992 as a company dedicated to solve a problem common for all the industries involved in glass processing: the glass particles.

The initial idea was to perform a physical separation by centrifugation. The process proved ineffective, so a new technology was developed. The way was long and full of difficulties but the objective was finally reached.

Nowadays, thanks to VITROSEP, customers in 5 continents are working in a more profitable and environmentally friendly way.

Our technical department is capable to achieve a broad spectrum of projects in the flat and optical glass industries. We have production facilities, technical support and supply of spare parts and consumables. Bearing in mind the continuously changing world we live in, we continue our research and quest for a better service to our customers.
