VAS "VASILIOU GLASS TECHNOLOGIES", a company fully compliant with the current European framework and norms, maintains a thorough and well-documented Factory Production Control system, while operating within two distinct appraisal systems, differentiated by the level of involvement of notified-body organizations in each one of them.

Specifically, VAS "VASILIOU GLASS TECHNOLOGIES" operates under the following systems:

System 1:

An independent third-party (notified body) a) determines the product-type and issues the product's Certificate of Constancy of Performance, which includes all relevant technical documentation and b) performs continuous monitoring, and evaluation of the Factory Production Control system.

System 3:

An independent third-party (notified body) specifies product-type on the basis of type-testing. The manufacturer implements and monitors the Factory Production Control System.
