

## Bulk catalysts

### Catalyst for gas purification

Bulk catalysts find preferred application in the field of gas purification and gas recycling. ReiCat has more than 35 years of experience in the optimal construction of flow optimized catalyst beds.

#### Your application

- Mainly applied in gas purification processes
- Contaminations can be eliminated out of the gas to less than a few ppbs.

#### Your advantages

- Warranties for the process, gas purity and life time
- Individual produced catalysts
- Long life cycle
- High efficiency and effectivity
- Approved technology

#### Our solution

- Mostly precious metal coated (impregnated) carriers in form of pellets, balls, etc.
- ReiCat offers multi-layer fillings, which provide selective elimination of different contaminations in one single reactor.

#### Special features

- Low energy consumption
- Easy handling and maintenance
- Possibility of precious metal recycling
