ПРОДУКТЫ / МАШИНЫ

The heart of the HORN Glass Industries AG is the engineering of glass melting furnaces for the glass industry. Numerous national as well as international companies have placed their entire plant engineering in the hands of HORN.

Plant planning and design are done on the most modern CAD stations and executed using equally modern construction methods. This has led to HORN being the "innovation factory". Furthermore the whole peripheral equipment around the furnace and forehearths is supplied.

Reliability and durability are the chief criteria for all equipment whether wholly or partly manufactured in house. Individual consultation in terms of the selection, adaptation and application of technically and economically sound solutions are HORN's speciality.

The company is specialized to tailor entire plant packages for Container and Float glass industry. The products outside of the standard range of HORN can be supplied together with the furnace. So to speak, HORN is your one-stop-shop.

ИСТОРИЯ И ПРОДУКТЫ

HORN Glass Industries AG, a German specialist in the design and supply of complete **glass melting technology** is a solution partner for the worldwide glass industry. With its abroad subsidiary companies in the Czech Republic, India, Malaysia, Ukraine, Brazil and China HORN match the glass industry requirement for local and fast activities.

With its more than 135 years of experience in glass melting HORN has a wide range of experience in the **design, manufacture and supply of different furnace types** for production of lighting ware, tableware, containers, cast glass, float glass, solar glass and technical glassware.

The range of products includes **utility equipment** as combustion systems, electric control equipment as well as modern process controlling with SCADA systems at the highest standard, to name but a few.

A reference of more than 20.000 tonnes of glass per day coming from furnaces made by HORN express the professional and reliable performance of the market leader in glass melting furnaces.
