COMPANY BACKGROUND / HISTORY

We are producing and distributing systems for printing and drying flat glass with ceramic and organic colors. We complete plants coming from one supplier – from planning to installation and after-sales-service.

Our extensive product range comprises:

* **Thermal and chemical glass tempering furnaces for flat and curved glass**

* **Automatic tempering furnace bed loading - no touching the low-e surface!**

* **Automatic unloading - no robot, no touching the low-e surface!**

Machines for Ceramic Ink Printing
Hasel steiner
www.haselsteiner-gmbh.com

*** Screen printing machines - for all sizes and automation**

*** Full surface roller coater**

*** Special glass edge and optional full-surface coater (edge roller coater)**

*** Continuous drying furnaces for ceramic or organic colours**

*** Glass washing machines**

*** Plant automation and plant networking**

*** Various transport routes and tilting tables**

With our machines and plant networking, we pay particular attention to cost and production efficiency. New investments should pay for themselves as quickly as possible and improve product quality. Our machines are characterized by high efficiency, lowest maintenance costs and user-friendliness.

2017 we have extended our offer and took over the representation of Cooltemper furnaces in Austria, Germany, Switzerland, Poland and Slovenia. Cooltemper is one of the world’s leading glass processing machinery manufacturers. Our main focus is on tempering furnaces and laminating systems.
